

Supplementary Material

Disciplinary Differences in the Empirical Conceptualization and Theoretical Explanation of Gender Differences in STEM Pathways: Contrasting Sociological and Psychological Concepts in the Context of Germany

Author: Ralf Minor

List of Supplements

Supplementary Material 1 Baseline Table for Snowballing/Pearl-Growing Searches	2
Supplementary Material 2 List of Articles for Rough Screening	4
Supplementary Material 3 Records Excluded During Full-Text	8
Supplementary Material 4 Included Studies by Theoretical Explicitness and Chosen Theory	9
Supplementary Material 5 Included Studies by Data Type and Design/Analysis Method	13
Supplementary Material 6 Included Studies by Dependent Variable, Life Path Concept and Gender-Specific Results	17
Supplementary Material 7 Included Studies by Modelled Variables and Alternative STEM Definitions	22
Supplementary Material 8 Studies Using Psychological Approaches EVT, SCT and SCCT by Modelled Determinants	26
Supplementary Material 9 Individual Journal Listings from Included Papers	28
References	31

Reference	Reason for exclusion from snowballing

Supplementary Material 4 | Included Studies by Theoretical Explicitness and Chosen Theory [N=47]

Study	Theoretical explicitness	Theory 1	Theory 2	Theory 3	Explicit discussion of interdisciplinarity
Apps et al. (2024)	1) Explicit theoretical approaches	"Bourdieu sociology" (Bourdieu 1977)			2) Interdisciplinary approaches are not discussed
Ardies et al. (2015)	3) A-theoretical approach				2) Interdisciplinary approaches are not discussed
Bagnoli et al. (2014)	3) A-theoretical approach				2) Interdisciplinary approaches are not discussed
Barone and Assirelli (2020)	1) Explicit theoretical approaches	Rational Choice	Horizontal preferences	Bounded rationality	2) Interdisciplinary approaches are not discussed
Barth and Masters (2020)	1) Explicit theoretical approaches	Stage-environment fit (Eccles et al. 1993)	Social cognitive theory (Bandura et al. 2001)	Expectancy-value theory (Eccles 2011)	2) Interdisciplinary approaches are not discussed
Bieri Buschor et al. (2014)	3) A-theoretical approach				2) Interdisciplinary approaches are not discussed
Card and Payne (2021)	3) A-theoretical approach				2) Interdisciplinary approaches are not discussed
Codioli McMaster (2017)	2) Implicit frameworks				2) Interdisciplinary approaches are not discussed
Correll (2001)	2) Implicit frameworks				2) Interdisciplinary approaches are not discussed
Ekmekci et al. (2019)	2) Implicit frameworks				2) Interdisciplinary approaches are not discussed
Farmer et al. (1995)	1) Explicit theoretical approaches	Social learning theory (Bandura 1978)	Social cognitive theory (Bandura 1986)		2) Interdisciplinary approaches are not discussed
Gao et al. (2025)	3) A-theoretical approach				2) Interdisciplinary approaches are not discussed

George (2000)	3) A-theoretical approach			2) Interdisciplinary approaches are not discussed
Guo et al. (2015)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles et al. 1983, Eccles 2009)		2) Interdisciplinary approaches are not discussed
Hanson (2004)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Jiang et al. (2020)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles 2009)	Dimensional comparison theory (Möller & Marsh 2013)	2) Interdisciplinary approaches are not discussed
Guo et al. (2018)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles 2009)	Dimensional comparison theory (Möller & Marsh 2013)	2) Interdisciplinary approaches are not discussed
Kelly (1986)	3) A-theoretical approach			2) Interdisciplinary approaches are not discussed
Keyserlingk et al. (2020)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Larose et al. (2008)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Le and Robbins (2016)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Legewie and DiPrete (2014)	3) A-theoretical approach			2) Interdisciplinary approaches are not discussed
Ma (2011)	1) Explicit theoretical approaches	Cumulative disadvantage theory (Merton 1968)	Revolving doors theory (Jacobs 1989)	2) Interdisciplinary approaches are not discussed
Maltese and Tai (2011)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Mann and DiPrete (2013)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Maple and Stage (1991)	3) A-theoretical approach			2) Interdisciplinary approaches are not discussed

Marsh et al. (2019)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles 1994)	Dimensional comparison theory (Möller and Marsh 2013)	2) Interdisciplinary approaches are not discussed
Mau (2003)	1) Explicit theoretical approaches	SCCT (Lent et al. 1996)		2) Interdisciplinary approaches are not discussed
Morgan et al. (2013)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Nix and Perez-Felkner (2019)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Parker et al. (2014)	1) Explicit theoretical approaches	Internal/external frame of reference (Marsh 1986)		2) Interdisciplinary approaches are not discussed
Perez-Felkner et al. (2014)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Perez-Felkner et al. (2017)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Raabe et al. (2019)	1) Explicit theoretical approaches	Wisconsin model (Carolan 2016, Salikutluk 2016, Sewell et al. 1969)	Homophily (McPherson et al. 2001)	1) Interdisciplinarity discussed
Riegle-Crumb et al. (2012)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Sadler et al. (2012)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed
Saw et al. (2018)	3) A-theoretical approach			2) Interdisciplinary approaches are not discussed
Sikora (2019)	2) Implicit frameworks			1) Interdisciplinarity discussed
Simpkins et al. (2006)	1) Explicit theoretical approaches	Expectancy-value theory (Parson [Eccles] et al. 1984)		2) Interdisciplinary approaches are not discussed
Strenta et al. (1994)	2) Implicit frameworks			2) Interdisciplinary approaches are not discussed

Trusty (2002)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles 1994)	Social learning theory (Krumboltz 1979)		2) Interdisciplinary approaches are not discussed
Tyson et al. (2007)	3) A-theoretical approach				2) Interdisciplinary approaches are not discussed
van der Vleuten et al. (2019)	2) Implicit frameworks				2) Interdisciplinary approaches are not discussed
Wang and Kenny (2014)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles 1983, 2009)			2) Interdisciplinary approaches are not discussed
Watt et al. (2017)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles 2005, Eccles et al. 1983)			2) Interdisciplinary approaches are not discussed
Wegemer and Eccles (2019)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles and Wigfield 2002)	Goal-congruity theory (Diekmann et al. 2017, Diekmann et al. 2010, Eagly & Wood 2011)		2) Interdisciplinary approaches are not discussed
Zhao and Perez-Felkner (2022)	1) Explicit theoretical approaches	Expectancy-value theory (Eccles 1983, Eccles and Wigfield 2002)	Self-efficacy (Bandura 1977)	Interest development model (Hidi and Renninger 2006)	2) Interdisciplinary approaches are not discussed

Supplementary Material 6 | Included Studies by Dependent Variable, Life Path Concept and Gender-Specific Results [N=47]

Study	Dependent variable (explicit)	Dependent variable (categorized)	Approach explicitness	Life path concept	Analysis perspective	Gender differences code
Apps et al. (2024)	Qualitative transition experiences	4) Not applicable	2) Abstract	4) None of these	2) Transitions	1) Disparities to the detriment of women
Ardies et al. (2015)	Interest, aspiration, gender perception	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities
Bagnoli et al. (2014)	Idealistic aspirations, occupations in adulthood	3) Combined aspirations and choices	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Barone and Assirelli (2020)	Field of study choice	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Barth and Masters (2020)	Interest in math and science	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	2) Transitions	4) Varying disparities
Bieri Buschor et al. (2014)	Choice of STEM college major	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	5) Not applicable
Card and Payne (2021)	STEM registration in HE	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Codioli McMaster (2017)	Subject choice	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities
Correll (2001)	Career-relevant decision	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Ekmekci et al. (2019)	Intention to study STEM	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities

Farmer et al. (1995)	Match and mismatch in STEM aspirations	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Gao et al. (2025)	Occupational aspirations and career choices	1) Occupational aspirations, interests or intentions for STEM	2) Abstract discussions	4) None of these	1) Trajectories	4) Varying disparities
George (2000)	Attitudes towards science	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities
Guo et al. (2015)	STEM major enrollment or course choice	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Hanson (2004)	Continuing and success in science	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	5) Not applicable
Jiang et al. (2020)	Course-taking, achievement and HE STEM enrollment	2) Major, degree or course field choice for STEM	2) Abstract	1) Life course	1) Trajectories	4) Varying disparities
Guo et al. (2018)	Subjective task values, STEM choices	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Kelly (1986)	Attitudes towards science domains	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	1) Trajectories	2) No disparities
Keyserlingk et al. (2020)	Enrollment in math-intensive university majors	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities
Larose et al. (2008)	Persistence in science and technology	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities

Le and Robbins (2016)	STEM degree attainment	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	2) No disparities
Legewie and DiPrete (2014)	Science and engineering attainment	2) Major, degree or course field choice for STEM	2) Abstract	1) Life course	1) Trajectories	1) Disparities to the detriment of women
Ma (2011)	STEM attainment	2) Major, degree or course field choice for STEM	2) Abstract	4) None of these	1) Trajectories	4) Varying disparities
Maltese and Tai (2011)	Number of upper-level STEM courses	2) Major, degree or course field choice for STEM	2) Abstract	4) None of these	1) Trajectories	2) No disparities
Mann and DiPrete (2013)	Mainly STEM major attainment	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Maple and Stage (1991)	Major choice in math/science	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities
Marsh et al. (2019)	STEM coursework	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Mau (2003)	Persistence in SE career aspirations	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Morgan et al. (2013)	college major STEM attainment	2) Major, degree or course field choice for STEM	1) Explicit approaches	1) Life course	1) Trajectories	1) Disparities to the detriment of women
Nix and Perez-Felkner (2019)	Declared major in high school and degree in higher education	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women

Parker et al. (2014)	Career aspirations and university majors in STEM and other fields	3) Combined aspirations and choices	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Perez-Felkner et al. (2014)	Attainment in STEM (degree, high school)	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Perez-Felkner et al. (2017)	Selection of PEMC major	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Raabe et al. (2019)	STEM preferences	1) Occupational aspirations, interests or intentions for STEM	1) Explicit approaches	1) Life course	1) Trajectories	1) Disparities to the detriment of women
Riegle-Crumb et al. (2012)	Declaration of PS/E or Bio. / Sci. major	2) Major, degree or course field choice for STEM	2) Abstract	1) Life course	1) Trajectories	1) Disparities to the detriment of women
Sadler et al. (2012)	STEM career interests	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Saw et al. (2018)	STEM career aspirations	1) Occupational aspirations, interests or intentions for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Sikora (2019)	Science career plans, choices, enrolment and employment	3) Combined aspirations and choices	1) Explicit approaches	1) Life course	1) Trajectories	4) Varying disparities
Simpkins et al. (2006)	Number of math and physical science courses	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities
Strenta et al. (1994)	Attrition from science	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	2) No disparities

Trusty (2002)	Choice of science and math major	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Tyson et al. (2007)	STEM degree attainment	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
van der Vleuten et al. (2019)	STEM field choice in HE	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Wang and Kenny (2014)	STEM college major	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Watt et al. (2017)	STEM career choices	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	4) Varying disparities
Wegemer and Eccles (2019)	MPECS/HBMS career aspirations, major choices and careers	3) Combined aspirations and choices	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
Zhao and Perez-Felkner (2022)	STEM degree attainment	2) Major, degree or course field choice for STEM	3) No discussion	4) None of these	1) Trajectories	1) Disparities to the detriment of women
